<p>Billet steel is one of the most widely ordered steel products by our customers due to its extensive applications.</p> <p>HPME’s steel manufacturing division is ready to meet customer demands with any quantity of billet steel.</p>																				
<p>Key Features of Billet Steel:</p> <ul style="list-style-type: none">• Steel billets are the second-stage product of steel production. They are hot-rolled and taken out directly during the steel casting process.• Highly ductile and soft, billets are typically produced in a square cross-section of less than 36 square inches (230 sq. cm).• They fall under the category of semi-finished casting products.• Billets are commonly used to create bars, rods, tubes, pipes, wires, and wire products. <p>Given their versatility, billet steel is in high demand for construction and other practical applications.</p>
